Subject: Tier III rodenticide bait station
Date: 08/10/2009 04:00 PM

Bill,

My client is going for a weather-proof Tier IV bait station but it failed the dog test, while it passed children and adults. So he wants to know if he can register the current weatherproof design as a Tier III with both indoor and outdoor use for certain markets as long as he adopts appropriate label language. This option really isn't covered under the current Mitigation document that I can find.

Thanks for your help,

Jim
